PROJECTS

AGRI-LAB | Python, TensorFlow, FastAPI, OpenCV, React, TypeScript, Deep Learning

Feb 2026

- Developed **Agri Lab**, an **AI-based Potato Leaf Disease Detection** web application using **Deep Learning and Convolutional Neural Networks (CNN)** to classify potato leaf diseases from images.
- Applied **image preprocessing techniques** such as **resizing, normalization, and dataset preparation** to improve model accuracy and performance.
- Implemented disease detection for categories including **Healthy, Early Blight, and Late Blight** with accurate prediction results.
- Designed a **responsive and user-friendly** web interface that allows users to **upload potato leaf images and receive real-time disease analysis**.

ATS RESUME | JavaScript, React, Next.js, Tailwind CSS

Feb 2025

- Developed a dynamic and **ATS-friendly resume builder** using **React for frontend, Express.js, and Node.js for backend**.
- Utilized **MongoDB** to store user data securely and efficiently.
- Enabled real-time resume preview and PDF download for users.
- Ensured **ATS-optimized formatting**, improving resume compatibility with automated recruitment systems.
